

Design and Construction of Harbour Upgrade in S. Meedhoo Project Mobilized

16th October 2019, Ref: MTCC-/MIS/2019/0711

We have mobilized to commence S. Meedhoo design and construction of harbor upgrade project on 12th October 2019. The site was mobilized after conducting an Environmental Impact Assessment (EIA) study, which was approved on 26th September 2019. 10 percent of the work is complete as of now.

We were contracted to design and construct S. Meedhoo harbour by the Ministry of National Planning and Infrastructure on 23rd June 2019. Under this agreement, the design and build of S. Meedhoo harbor consists of a 2480m harbor pavement; 57,996 cbm of dredging and reclamation along with construction of a 115m breakwater; and a 208m quay wall.

The project is valued at MVR 35,436,107.38. and is expected to be completed in 365 days.
